HEAD LICE PROGRAM

For the many families and teachers of school-aged children, head lice continue to create concerns. While it is known that head lice do not carry any infectious disease, the principal, teaching staff and school council at Our Lady of Fatima have developed a parent-managed head lice program to help parents manage head lice. A group of volunteer parents at the school have coordinated the program and it is fully supported by the school. All volunteer parents sign a confidentiality agreement to ensure information privacy for all children and their families.

Program goals include:

- Reduce the frustration and misinformation associated with head lice.
- Decrease the concerns regarding head lice within the school community
- Protect families from misusing potentially harmful insecticide treatments.

We invite you to include your child in our screening program, which runs at least once per term.

The volunteer parents check each class student, by student, each term.

**There are no toxic chemicals used and no treatment is undertaken at the school.

If you would like to include your child in our screening program, please complete the permission slip below and return to the school.

If you would prefer to screen your child yourself, information on the best techniques is available from the school office.

Regular updates about our program will appear in the School Newsletter. Interested parents are welcome to participate in the screening program. For further details and information please feel free to contact the school.

Thankyou

Monica Coyle
